

WAJID BABASO JAMADAR

AI Engineer | LLM & GenAI | Backend Systems

Mumbai, Maharashtra, India | +91 7021009637 | wajidjamadar01@gmail.com

linkedin.com/in/wajid-jamadar | github.com/Jamadar01

PROFESSIONAL SUMMARY

AI Engineer with 2+ years of experience building production-grade, LLM-powered applications and scalable backend systems using Python, Node.js, and Google Cloud. Specialized in integrating large language models (OpenAI, Google Gemini, Vertex AI) with LangChain, vector databases, and prompt engineering to deliver automated, AI-driven workflows. Google Cloud Professional Data Engineer certified, with strong foundations in REST API design, microservices, real-time systems, and cloud-native deployment on Docker and Kubernetes.

TECHNICAL SKILLS

AI & GenAI: LLM API Integration (OpenAI, Google Gemini, Vertex AI), Prompt Engineering, LangChain, RAG, AI Agents, Function Calling, Embeddings, Vector Databases (Pinecone), AI Chat Systems

Languages: Python, JavaScript, SQL

Backend: FastAPI, Node.js, Express.js, REST APIs, Microservices, WebSockets, RabbitMQ

Cloud & DevOps: GCP, AWS, Docker, Kubernetes, CI/CD (GitHub Actions, Jenkins, Argo CD)

Databases: PostgreSQL, MongoDB, MySQL, Redis

Security & Performance: JWT, OAuth 2.0, API Security, Redis Caching, Performance Optimization

Tools: Git, GitHub, Postman, Lens

Frontend (Familiar): React.js, Angular

PROFESSIONAL EXPERIENCE

AI / Software Developer

April 2024 – Present

Wohlig Transformation

Sion, Maharashtra, India

- Built and shipped production **LLM-powered features** integrating OpenAI, Google Gemini, and Vertex AI through LangChain — including a real-time AI chat system with prompt engineering and session management.
- Implemented **RAG (retrieval-augmented generation)** with embeddings and **vector search (Pinecone)** to ground chat responses in relevant, context-aware information.

Jobizo — AI Resume Analysis & Job Recommendation Platform

- Developed an LLM pipeline using **Google Gemini** that parses resumes into structured candidate profiles and generates automated **ATS compatibility scores** with actionable improvement feedback.
- Built a **web-scraping and matching engine** with **Apify** that sources live job postings and ranks them against candidate profiles using **embeddings-based semantic matching** with Gemini.

QuickClick — AI Fashion Photoshoot Generation

- Built an **AI image and video generation pipeline** using ComfyUI, Google Gemini, and Kling to produce on-model fashion photoshoot visuals, reducing reliance on manual studio shoots.
- Engineered **LLM-driven prompt generation** to render consistent garments and styling on a fixed model across multiple looks.

Platform & Infrastructure

- Improved system performance by **35%** and cut API latency to **under 300ms** via Redis caching and query optimization; deployed microservices on **GCP** using Docker, Kubernetes, Argo CD, and GitHub Actions.

Software Developer Intern

Mar 2024 – Aug 2024

43Appmart Technologies Pvt. Ltd.

Andheri, Maharashtra, India

- Rebuilt the SPIT college **Alumni Network platform** with Angular, Node.js, and MongoDB — delivering a modern, responsive UI backed by scalable RESTful APIs.
- Implemented **real-time messaging with WebSockets**, increasing engagement across alumni users.

EDUCATION

B.Tech, Electronics Engineering

Sardar Patel Institute of Technology (SPIT), Mumbai

2020 – 2024

CGPA: 6.73

CERTIFICATIONS

- Google Cloud Professional Data Engineer** — 2025

ACHIEVEMENTS

- Top 10 of 300+ teams** — IIT Hyderabad Web Development Hackathon (2023).
- AI Amplify Hackathon (2023)** — built an AI-based solution within a 24-hour team event (Finance-1 & Atrina).
